<b>Catalog No.</b>	CEM003	<b>Quantity:</b>	1.0 mg
<b>Alternate Names:</b>	PCT		
<b>Description:</b>	The monoclonal antibody recognizes human Procalcitonin (PCT), a 116 amino acid precursor of the hormone calcitonin. Procalcitonin arises from endopeptidase-cleaved preprocalcitonin. It undergoes successive cleavages in the neuroendocrine cells of the thyroid to form three distinct molecules: calcitonin (32 amino acids); C-terminal fragment katacalcin (21 amino acids) and N-terminal fragment, aminoprocalcitonin (57 amino acids).
