

Human Umbilical Cord Serum, Pooled Donors

Catalog No.	CSI20377A	Quantity:	10 ml
	CSI20377B		100 ml

Description: Cord blood remains in the blood vessels of the placenta and in the attached umbilical cord after childbirth. Cord blood is rich in hematopoietic stem / progenitor cells while it contains all the usual components of blood (red blood cells, platelets, white blood cells, and plasma). Serum is separated from clotted cord blood, pooled from 3 or more donors and frozen.

Source: Serum separated from human umbilical cord blood following a 2nd to 3rd trimester birth. Pooled from at least 3 donors.

Appearance: Lightly red to straw colored

Storage & Stability: Store at -20°C to -80°C.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
