Human Cerebrospinal Fluid (CSF), Pooled Donors

Catalog No.	CSI20437A CSI20437B	**Quantity:**	1.0 ml 10 ml

Alternate Names: CSF, Spinal Fluid, Cerebral Spinal Fluid

Description: Cerebrospinal fluid (CSF) is a clear colorless bodily fluid produced in the choroid plexus of the brain. It acts as a cushion or buffer for the cortex, providing a basic mechanical and immunological protection to the brain inside the skull and serves a vital function in cerebral autoregulation of cerebral blood flow.

Specify gender or mixed gender pool.
Additional specifications by custom collection.

Source: **≥ 3 donors per pool**
Healthy human donors mixed gender or specify gender

Appearance: Colorless to light yellow

Preservatives: None

Filtration: None

Country of Origin: USA

Storage & Stability: Upon receipt, store unopened at -20°C to -80°C for at least 1 year. Upon initial thaw, prepare aliquots to store at -20°C to -80°C.
Avoid repeated freeze-thaw cycles.

Certification: The donor(s) used in this product have been tested with FDA CBER licensed screening tests (TITLE 21 - CFR PART 610.40) and shown to be non-reactive for the following: HIV -1/HCV/HBV/WNV by NAT, Syphilis, HBcAg, HBsAg, HCV Ab, HIV-1&2 Ab, T.cruzi Ab, either on the current donation or at least one previous donation. However, because no test method can offer complete assurance that infectious agents are absent, this material should be handled at Bio-Safety Level 2 (BSL 2) as recommended for potentially infectious human serum or blood specimen in the CCD/NIH manual "Biosafety in Microbiological and Biomedical Laboratories", 2009.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
