

## Human Umbilical Cord Plasma, Single Donor

**Catalog No.** CSI20439-1ml                      **Quantity:** 1 ML

**Description:** Single donor cord blood is obtained from umbilicus following a 2nd to 3rd trimester birth. It is collected in small volumes (under 5 ml) and processed as EDTA plasma.

**Source:** Unique single donor blood collected from human umbilical cord following a 2nd to 3rd trimester birth.

**Form:** EDTA plasma

**Storage & Stability:** Store at -20°C to -80°C.

**Non-Infectious Disease Statement:** Non-Infectious Disease Certification: Non-reactive for HIV-1/HCV/HBV by NAT; Syphilis, HBcAg, HBsAg, HCV Ab, HIV-1&2 Ab and RPR by currently approved FDA methods. However, because no test method can offer complete assurance that infectious agents are absent, this material should be handled at Bio-Safety Level 2 (BSL 2) as recommended for potentially infectious human serum or blood specimen in the CCD/NIH manual "Biosafety in Microbiological and Biomedical Laboratories", 2009.

**NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.**
