Research Grade Naglazyme / Galsulfase

Catalog No.	DHD13229A DHD13229B	Quantity:	100 µg 1.0 mg
Alternate Names:	Naglazyme™		
Description:	Research Grade Naglazyme/Galsulfase is a variant of N-acetylgalactosamine 4-sulfatase, a polymorphic human enzyme. It is used as an enzyme replacement therapy for the treatment of mucopolysaccharidosis VI (MPS VI).		
UniProt ID (target):	P15848		
Target:	Human N-acetylgalactosamine-4-sulfatase (G4S)		
Concentration:	1.0 mg/ml, lot specific		
Source:	XtenCHO		
Formulation:	0.01M PBS buffer, pH 7.4		
Purity:	> 95% by SDS-PAGE		
Endotoxin Level:	≤ 0.01 EU/µg by LAL analysis		
Purification:	Ion exchange chromatography		
INN:	Galsulfase		
Storage & Stability:	Store at 2-8°C for up to 1 week, or as aliquots at -20°C to -80°C for up to 1 year. Avoid freeze/thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
