

HA

Research Grade Anti-Influenza A virus HA/Hemagglutinin (MEDI8852) mAb

Catalog No.	DVV03808A DVV03808B	Quantity:	100 µg 1.0 mg
Alternate Names:	Influenza Virus (Flu) hemagglutinin		
Description:	Research Grade Anti-Influenza A virus HA/Hemagglutinin (MEDI8852) is a human monoclonal antibody that targets Influenza A virus (strain A/Hong Kong/212/2003 H5N1 genotype Z+) hemagglutinin.		
UniProt ID (target):	Q6J8F6		
Target:	Influenza A virus (strain A/Hong Kong/212/2003 H5N1 genotype Z+) hemagglutinin		
Concentration:	1.0 mg/ml, lot specific		
Source:	Mammalian cells		
Isotype:	Human IgG1		
Formulation:	30 mM histidine pH 5.8, 10% sucrose, 0.06% Tween 80		
Purity:	> 95% by SDS-PAGE		
Endotoxin Level:	≤ 0.01 EU/µg by LAL analysis		
Purification:	Protein A/G affinity chromatography		
Clone:	MEDI8852		
Applications:	Functional studies		
Storage & Stability:	Store at 2-8°C for up to 1 week, or in working aliquots at -20°C to -80°C for up to 1 year. Avoid freeze/thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
