

ROR1

Human Anti-Human ROR1 (P3A1) mAb

Catalog No.	FHF90720A FHF90720B FHF90720C	Quantity:	50 µg 100 µg 1.0 mg
Alternate Names:	Inactive tyrosine-protein kinase transmembrane receptor ROR1, mROR1, Neurotrophic tyrosine kinase, receptor-related 1		
Description:	Receptor tyrosine kinase ROR1 plays an essential role in embryogenesis and is overexpressed in many types of malignant tumors. Studies have demonstrated that in oncogenesis ROR1 activates cell survival signaling events, particularly the non-canonical WNT signaling pathway. Antibody-based immunotherapies targeting ROR1 show promise in certain malignancies.
