

Mouse Anti-Human Acidic Keratin Type I (Clone AE-1) mAb

Catalog No.	MON3037	Quantity:	250 ug
Description:	MON 3037 recognizes most of the acidic (Type I) keratins. It's broadly reactive and stains positively almost all epithelia and their neoplasms. . In addition, this antibody exhibits the interesting property of producing heterogeneous staining within a given epithelium; the detailed staining pattern varies depending on the differentiated and/or growth state of the individual cells.		
Concentration:	1 mg/ml		
Specificity:	Epithelial Keratin Type I		
Host:	Mouse		
Immunogen:	Epidermal keratin		
Isotype:	IgG1		
Clone:	AE-1		
Formulation:	Purified antibody in PBS containing 0.1% sodium azide		
Cross-Reactivity:	Reacts with keratin from rabbit, mouse, rat, bovine and chicken.		
Applications:	WB, IHC		
Storage & Stability:	Store at 2-8°C for up to 1 year.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
