

H1-0

Mouse Anti-Human Histone H1 (Clone AE-4) mAb

Catalog No.	MON3048	Quantity:	100 µg
Alternate Names:	Histone H1.0, Histone H', Histone H1(0)		
Description:	MON 3048 recognizes histone H1 in the nuclei of animal and plant cells. It produces a speckled nuclear staining pattern in normal and malignant cells.		
Concentration:	0.1 mg/ml		
UniProt ID:	P07305		
Specificity:	Histone H1		
Host:	Mouse		
Immunogen:	Human leukemia biopsy cells		
Isotype:	IgG2a kappa		
Clone:	AE-4		
Formulation:	Purified antibody in PBS with 0.02% sodium azide.		
Applications:	Flow cytometry: starting concentration 1.0-2.0 µg/10 ⁶ cells/0.1 ml Immunofluorescence: starting concentration 0.5-1.0 µg/ml IHC: 1-2 µg/ml for 30 min at RT ELISA, WB		
Storage & Stability:	Store antibody at 2-8°C until expiration date.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
